Cover Letter: AI Integration Specialist

ABXplay Kyiv 2026-07-05

Dear ABXplay Hiring Team,

I am writing to express my strong interest in the AI Integration Specialist position. With a background in architecting autonomous AI agents and optimizing business workflows, I understand the importance of bridging the gap between advanced LLM capabilities and practical operational efficiency.

I am an AI Agent Architect who combines deep technical expertise in RAG pipelines and prompt engineering with a solid foundation in marketing and sales. This unique mix allows me to not only build complex automation systems but also identify the precise business processes where they will deliver the highest ROI.

- **Designed an n8n-based lead qualification workflow integrating OpenAI API and Pipedrive CRM to automate B2B prospecting.**, Reduced the initial lead response time from 4 hours to 3 minutes, significantly improving lead engagement and conversion rates.
- **Built a RAG-powered customer support agent for a bus ticket company using Python State Machine and internal API integration.**, Successfully offloaded the workload of 10 live operators by implementing intelligent escalation logic that minimized false positives.
- **Developed a voice AI agent for a real estate agency featuring a custom RAG pipeline with hybrid search and query rewriting.**, Enabled autonomous handling of client inquiries with high accuracy and human-in-the-loop escalation for edge cases.

Your team needs a self-driven specialist who can analyze workflows across departments and implement tools that actually stick. My experience in marketing helps me empathize with the needs of Sales and HR teams, while my technical skills in n8n, Python, and RAG allow me to build robust, scalable solutions. I excel at documenting processes and training colleagues, ensuring that the automations I build are adopted and maintained effectively.

I am confident that my ability to turn AI potential into business value makes me a great fit for ABXplay. I look forward to the possibility of discussing how I can contribute to your team's success.
