Cover Letter: Data Scientist (LLM, LangChain, RAG)

Dataforest Kyiv 2026-07-05

Dear Dataforest Hiring Team,

I am writing to express my strong interest in the Data Scientist (LLM, LangChain, RAG) position at Dataforest. With a focus on implementing AI solutions that achieve concrete business goals, I see a perfect alignment between your need for cutting-edge AI adoption and my expertise in building autonomous agents.

I am an AI Agent Architect who combines deep technical proficiency in LLM architecture with a strategic understanding of marketing and sales funnels. My approach goes beyond theoretical modeling; I specialize in deploying RAG pipelines and multi-agent systems that directly automate business processes and enhance operational efficiency.

- **Developed a comprehensive RAG-based customer support agent for a bus ticket company, utilizing Python state machines and internal API integrations.**, Successfully offloaded the workload of 10 live operators by implementing sophisticated escalation logic and real-time data retrieval.
- **Architected an n8n-based workflow for B2B lead qualification, integrating OpenAI API with Pipedrive CRM for automated segmentation.**, Drastically reduced the first response time from 4 hours to 3 minutes, ensuring immediate engagement with potential clients.
- **Built a voice AI agent for a real estate agency featuring hybrid search, query rewriting, and custom embedding models.**, Enabled fully autonomous client consultations with high accuracy, handling complex property inquiries without human intervention.

Dataforest aims to transform business challenges into AI applications, a challenge I meet by focusing on practical utility and integration. My superpower lies in designing RAG systems that minimize hallucinations through advanced prompt engineering and seamlessly connecting agents to existing CRMs and APIs. I ensure that AI solutions are not just technically sound but are viable business tools that drive productivity and solve real-world problems.

I am confident that my background in AI-driven development and business automation makes me a strong fit for your team. I look forward to the opportunity to discuss how I can contribute to Dataforest's innovative projects.
