Cover Letter: AI Advisor

LITSLINK Kyiv 2026-07-05

Dear Hiring Team at LITSLINK,

I am writing to express my strong interest in the AI Advisor position. With a deep technical background in AI Agent architecture and practical experience in business automation, I understand that LITSLINK needs a bridge between complex AI technologies and tangible business value for your clients.

I am an AI Agent Architect and Solutions Specialist who combines expertise in LLMs and RAG pipelines with a strong foundation in marketing and sales. This unique blend allows me to not only design sophisticated autonomous systems but also clearly articulate their ROI to stakeholders, making me an ideal fit for a role that sits at the intersection of AI, business, and consulting.

- **Designed and deployed a RAG-based AI Support Agent for a bus ticket company using Python State Machine and internal API integrations.**, Successfully offloaded 10 live operators by implementing complex escalation logic and prompt engineering, maintaining service quality while significantly reducing manual workload.
- **Built an automated n8n workflow for B2B lead qualification, integrating OpenAI API with Pipedrive CRM to capture and score leads from multiple channels.**, Reduced the lead response time from 4 hours to 3 minutes and automated CRM data entry, directly accelerating the sales funnel.
- **Developed a Voice AI Agent for a real estate agency featuring advanced RAG pipelines, query rewriting, and hybrid search.**, Enabled fully autonomous client consultations with human-in-the-loop escalation for edge cases, handling complex property queries without human intervention.

LITSLINK faces the challenge of translating rapid AI advancements into practical consulting advice and internal adoption. My superpower is the ability to demystify complex concepts like RAG, Agents, and Embeddings for both technical and non-technical audiences. I can solve your need for effective knowledge sharing by leading workshops that empower your teams, and I can support presales activities by identifying high-impact AI opportunities that drive real revenue for clients.

I am eager to help LITSLINK grow its AI practice and support your team in navigating the evolving AI landscape. I look forward to discussing how my experience in building business-centric AI solutions can add value to your clients and internal operations.
